COMFORTABLE HEAT AND DECORATIVE SHELVES...NOW COMBINED IN THE *FIREHEARTH* DIVIDER WALL

Divider walls have become increasingly popular for separating living areas without sacrificing spaciousness. Now comes FireHEARTH Divider Wall... a handsome fireplace combined with decorative shelf units to create a most unusual room divider... the FireHEARTH inner fire chamber and Trip-L-Flue insulate the unit safely. Modular-type construction of the shelves and extenders make it possible for you to work out just the right effect you desire, installed in any type of construction with limited effort and time.

Designed by
C. W. Smith

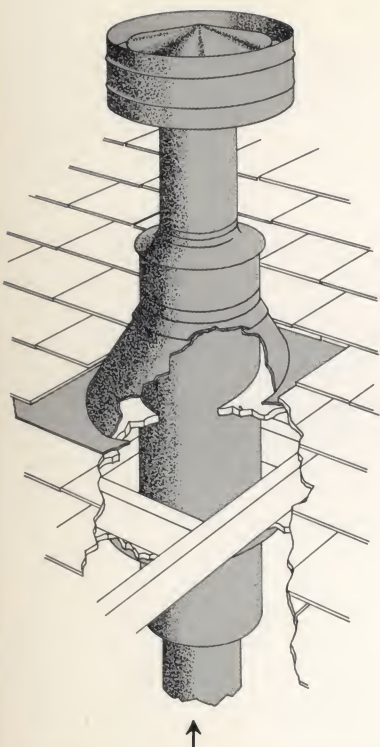

NEW FIREHEARTH . . . CONVENTIONAL WITH A MODERN FLAIR

The all new Planet FireHEARTH offers a conventional yet completely modern look, designed to fit into either new construction or remodeling with ease and simplicity of installation, and to enhance the "fireplace area" of any room. Two versatile models for either *free-standing* or *wall-fastened* application. Finished completely in

attractive matte black, with a bright colored visor in beautiful porcelain enamel (4 decorator colors available). Full 30" capacity in the firebox allows for using "man-sized" logs. Air cooled outer cabinet provides for the efficient circulation of the heat into the room. Full width sliding screen furnished as standard equipment.

FIREHOOD ROOF JACK ASSEMBLY

The floor-to-ceiling installation of a Firehood needs a Roof Jack assembly as shown on the drawing illustration above. Note that the Roof Jack carries on from the Firehood stack right through the ceiling and roof to insure complete fire protection. When ordering your Firehood, be sure to order a Roof Jack.

FIREHEARTH AND DIVIDER WALL CHIMNEY INSTALLATION

A complete triple flue chimney from the unit through the ceiling and roof assures you of a well insulated and protected installation. The roof assembly shown at right is all that is necessary with either the Firehearth or Firehearth Divider Wall.

CUSTOM HOODS

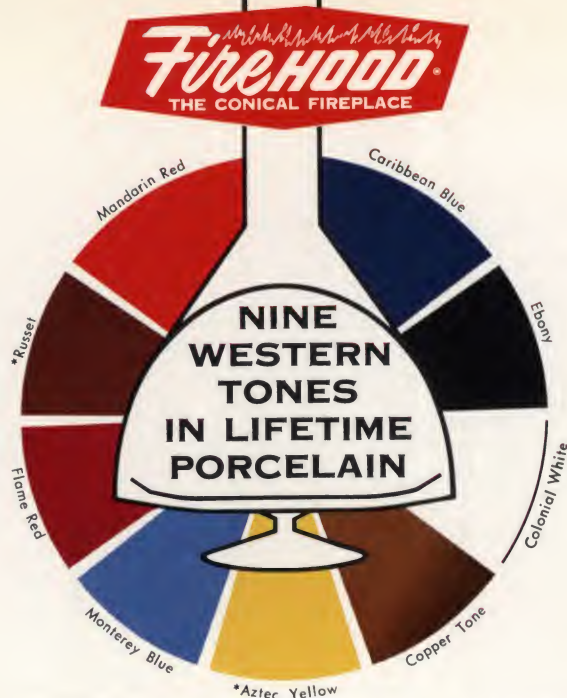

Custom metal hoods, either built in or suspended from ceiling, can be designed and built to your exact specifications.

*Custom colors available on special order from the factory.

MODEL TM is basic FireHOOD unit with attractive spun steel base; standard black matte heat-resistant finish . . . also nine Western color tones in lifetime porcelain.

MODEL TO FireHOOD without hearth or base is designed for installation on job-fabricated hearth of fire brick or refractory cement.

MODEL TS FireHOOD has four rubber-tipped steel legs. Simple, attractive lines for that "modern look."

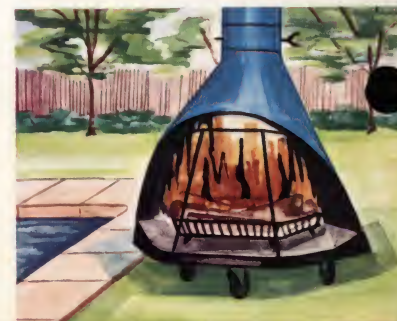

MODEL TC for outdoor use, is equipped with three large casters . . . completely mobile for moving about on the patio or poolside.

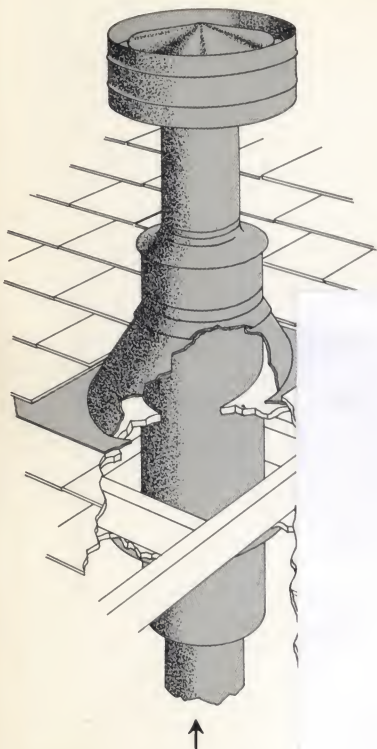

CONSTRUCTION DETAILS:

Exclusive conical hood of heavy gauge welded steel construction. Extra heavy steel liner for additional protection and longer life. FireHOOD is available in 3 sizes to suit every requirement from mobile homes, yachts, offices, apartments to homes of any size. Beautiful solid copper models available on special order. FireHOOD prices vary with the model . . . but are much less than for masonry fireplaces.

Accessories for these various fireplace units are: attractive tool sets, unique wood baskets, and the wonderfully versatile Broil-it charcoal broiler to fit most every fireplace.
